ABSTRACT

This study is specifically concerned with the effect of universal health care implementation on business model of PT XYZ, and knowledge contribution for new pharmaceutical company. Data for this study were gathered from interview with stakeholders of PT XYZ, and questionnaires of 44 patients at private and public hospital in Jakarta and Bekasi. The questionnaires investigated the understanding level of respondents about BadanPelaksanaJaminanSosial (BPJS)andtheirperception of drugs quality. These results suggest that innovation of PT XYZ's business model is needed to implement short-term strategy and suggest that PT XYZ need to establish its long-term strategy to anticipate full implementation of BPJS in 2019.;This study is specifically concerned with the effect of universal health care implementation on business model of PT XYZ, and knowledge contribution for new pharmaceutical company.
