## Abstrak

[<b>ABSTRAK</b><br>

Makalah ini menyelidiki apakah kualitas tata kelola (governance) pemerintahan berkorelasi dengan pembangunan ekonomi di tingkat Kabupaten di Indonesia. Menggunakan analisis cross-sectional, penelitian ini meneliti dampak dari indikator pemerintahan di kabupaten terhadap kinerja ekonomi. Selain itu, metode variabel instrumental digunakan untuk menyelidiki masalah kausalitas antara tata kelola dan pertumbuhan ekonomi. Penelitian ini menggunakan survei Tata Kelola Ekonomi Daerah sebagai variabel untuk tata kelola pemerintahan dan jumlah kecamatan sebagai variabel instrumental. Temuan utama penelitian ini adalah bahwa interaksi pemerintah dengan pihak swasta, biaya transaksi dan tata kelola infrastruktur merupakan faktor penting untuk meningkatkan kinerja ekonomi. Penelitian ini juga menemukan indikasi bahwa terdapat hubungan positif dari tata kelola terhadap kinerja ekonomi.

<b>ABSTRACT</b><br>

This paper explore whether the quality of governance correlate with economic development at local level in Indonesia. Using cross-sectional analyses, this study examines the impacts of governance indicators on districts economic performance. In addition, instrumental variable method is use to investigate the causality issue between governance and economic growth. This study utilizes the Local Economic Governance survey as the variable for governance and the number of subdistricts as the instrumental variable. The main finding is that that government-business interaction, transaction costs and infrastructure governance are important factors to increase economic performance. This study also finds tentative evidence of the positive relationship from economic governance to economic performance, This paper explore whether the quality of governance correlate with economic development at local level in Indonesia.
