[ABSTRAK

Penelitian ini berusaha melihat implementasi operasi intelijen secara kolaborasi dalam rangka pemberantasan terorisme di Poso. Adapun dalam operasi intelijen terdapat dua bentuk operasi yaitu operasi intelijen secara fusi dan operasi intelijen secara kompartemen. Kedua operasi ini secara normatifnya diharapkan dapat terciptanya sebuah kolaborasi yang baik, dari mulai aktivitas hingga pada produk intelijen. Adapaun lokasi penelitian adalah wilayah Poso Provinsi Sulawesi Tengah, karena mengingat banyaknya satuan penanganan yang terlibat dalam permasalahan keamanan di Poso. Pertanyaan penelitian berfokus kepada benarkah imlementasi operasi intelijen secara kolaborasi dalam pemberantasan terorisme di Poso efektif?. Penelitian ini adalah penelitian kualitatif. Penelitian ini akan menggunakan teori kolaborasi untuk mengetahui sejauh mana kolaborasi berjalan serta hambatannya. Peneliti akan membandingkan kenyataan implementasi di lapangan dan mencoba melihat apakah kolaborasi berjalan secara efektif atau tidak ?. Karena banyaknya satuan penanganan yang terlibat, seolah terjadinya rivalitas dalam pelaksanaan tugas operasi. Untuk memperdalam analisa, akan digunakan analisa SWOT dan Wild Card Analysis untuk melihat efektifitas kolaborasi operasi intelijen antara Kompartemen dan Fusi;

ABSTRACT

This study tried to look at the implementation of collaborative intelligence operations in order to eradicate terrorism in Poso. As for the intelligence operation, there are two forms of surgery which is a fusion of intelligence operations and intelligence operations in the compartment. The second operation is expected to create a normative good collaboration, from the star activity to the intelligence product. As for the location of the research is the area of Poso in Central Sulawesi Province. Because given the many units involved in handling security issues in Poso. research questions focus on true implementation of collaborative intelligence operations in the Poso effective counter-terrorism?. This research is qualitative research. This study will use the theory of collaboration to determine the extend of collaboration and resistance running. This study will compare the reality of implementation on the ground and tried it see if the collaboration works effectively or not?, because of the handling unit as the rivalry involved in the implementation of the operation tasks. Analysis will be used to deepen the analysis SWOT and Wild Card to

see the effectiveness of collaborative intelligence operations between compartments and fusion.;This study tried to look at the implementation of collaborative intelligence operations in order to eradicate terrorism in Poso.
