Abstrak

[ABSTRAK

Infark Miokard Akut dan lingkungan perawatan mempengaruhi kondisi fisik, psikologis dan sosial pasien. Penerapan perilaku caring dapat meningkatkan perubahan positif serta membangun kepercayaan dan kepuasan pasien beserta keluarganya. Penelitian ini bertujuan mendapatkan gambaran pengalaman perawat dalam menerapkan perilaku caring pada pasien IMA di Unit Perawatan Intensif. Desain kualitatif fenomenologi dipilih untuk mendapatkan informasi yang mendalam dengan wawancara pada dua belas perawat yang ditentukan melalui teknik purposive. Content analisis Collaizi menghasilkan delapan tema yang terpola dalam fenomena spirit of caring, penerapan caring dan hambatan caring. Diharapkan adanya program untuk meningkatkan penerapan perilaku caring untuk menangani pasien dalam kondisi akut dan kritis;
