[<b>ABSTRAK</b><br>

Tesis ini membahas tentang pelaksanaan program pelayanan luar lembaga di Pusat Pengembangan Pelayanan Sosial Anak (P3SA) serta melihat kendala yang ditemukan dalam pelaksanaannya. Penelitian ini adalah penelitian kualitatif dengan desain deskriptif. Hasil penelitian menunjukkan bahwa program pelayanan luar lembaga merupakan program yang ada karena adanya kebijakan Standar Nasional Pengasuhan Anak (SNPA). Dalam pelaksanaannya ditemukan kendala dalam hal sumber daya manusia, sistem pendampingan, dan kebijakan yang terkait dengan program, dan menyarankan agar P3SA/SDC lebih jauh lagi terlibat dalam pendampingan kepada penerima manfaat terutama dalam pelaksanaan FDS dan CDS yang merupakan kegiatan utama dari program pelayanan luar lembaga.

<b>ABSTRACT</b><br>

This thesis discusses the implementation of an external service program at the Child Development Center of Social Services (SDC) and see the constraints that are found in practice. This study is a qualitative research with descriptive design . The results showed that an external service program is an existing program because of the policy of the National Childcare Standards. Found in the implementation constraints in terms of human resources , guidance systems , and policies related to the program , and suggested that P3SA / SDC further involved in the assistance to the beneficiaries , especially in the implementation of the FDS and CDS which is the main activity of the service program outside the institution ., This thesis discusses the implementation of an external service program at the Child Development Center of Social Services (SDC) and see the constraints that are found in practice.
