Abstrak

[ABSTRAK

Lansia diabetesi sebagai populasi rentan di komunitas memerlukan dukungan. Salah satu dukungan yang ada di komunitas adalah self help group. Penelitian ini mengidentifikasi pengalaman lansia diabetesi dalam mengikuti kegiatan Rumpi Pendiam. Desain penelitian menggunakan fenomenologi deskriptif, dengan metode wawancara mendalam dan catatan lapangan pada tujuh partisipan. Hasil penelitian dianalisis menggunakan metode Colaizzi. Tema penelitian yang ditemukan adalah merasakan manfaat positif dari program, penilaian terhadap layanan, mendapat dukungan perhatian untuk mengikuti kegiatan dan fasilitasi kebutuhan, harapan agar program berlanjut, dan mengikuti kegiatan menumbuhkan nilai spiritual positif. Penelitian ini merekomendasikan perlunya evaluasi dari program Rumpi Pendiam agar program dapat berlanjut dan teratur.
