Abstrak

[ABSTRAK

Tesis ini akan membahas proyeksi dan antisipasi strategis situs-situs radikal pasca kebijakan pemerintah menutup situs-situs tersebut. Situs-situs radikal adalah salah satu instrumen yang digunakan oleh teroris dan pelaku jihad online untuk menyebarkan berita provokatif, propaganda, dan juga perencanaan aksi terror. Teori regulasi, model analisis antisipasi strategis dan proyeksi intelijen penegakan hukum dan metode penelitian kualitatif digunakan dalam melakukan proyeksi and antisipasi strategis dalam tesis ini. Penggunaan deep web, steganography, imitasi spam, membentuk kafilah cyber bahkan perang psikologis terhadap pemerintah diproyeksi akan dilakukan oleh teroris dan pelaku jihad online pada masa mendatang. Antisipasi dapat dilakukan pemerintah melalui pemblokiran situs, mengkaji kembali strategi kontra narasi, sindikasi situs, pelatihan soft skill terhadap masyarakat, optimalisasi cyber army, memperkuat intelligence sharing, penggunaan software dan juga membentuk undang-undang radikalisasi online. Sebagai kesimpulan penelitian ini perkembangan situs-situs radikal akan tetap berkembang seiring perkembangan teknologi dan tren maka pemerintah dan aparat keamanan harus segera mengantisipasi dan mencegah tindak radikalisasi online yang dilakukan oleh teroris maupun pelaku jihad online.

ABSTRACT

This thesis discusses on how to project and anticipate radical websites strategically following government policy on shutting them down. Radical websites are one of the instruments used by terrorists and online jihadists to spread provocative news, propaganda, as well as to plan terror attacks. Regulation theory, analysis model of strategic anticipation and projection of law intelligence enforcement, and qualitative research method are used in projecting and anticipating in this thesis. The use of deep web, steganography, spam mimicking, establishment of cyber caliphate even a psychological warfare against the government are projected to be carried out by terrorists and online jihadists in the future. Anticipation can be done by the government through blocking, reevaluating counter narrative strategy, websites syndication, soft skills training for public, optimizing cyber army, strengthening the intelligence sharing, using software and establishing a new constitution regarding online radicalization. As a

conclusion of this research, the development of radical websites will keep on developing as technology and trend develop so that the government and law enforcement have to anticipate and prevent online radicalization that have been conducted by terrorists and online jihadists., This thesis discusses on how to project and anticipate radical websites
