Abstrak

[ABSTRAK

Penelitian ini bertujuan untuk menganalisis dan merancang sistem pendaftaran diklat berbasis website agar proses pendaftaran diklat menjadi lebih cepat dan efisien. Penelitian merupakan studi kasus pada organisasi Pusdiklatwas BPKP. Metode penelitian yang digunakan untuk pengumpulan data adalah observasi di lokasi, wawancara dengan pihak-pihak terkait, dan studi literatur. Untuk perancangan sistem, metode yang digunakan adalah Framework for the Application of System Thinking (FAST). Hasil penelitian menunjukkan bahwa perancangan sistem berbasis website sangat mungkin akan memudahkan dan mengefisienkan proses pendaftaran diklat di Pusdiklatwas BPKP.

ABSTRACT

This research is aimed to analysis and design of website based training registration system so the registration process become faster and more efficient. This research is a case study at Supervisory Education and Training Center of Finance and Development Supervisory Agency (Pusdiklatwas BPKP). The research methods used for data collection are interviews and observations together with literary study. The research method used for training registration system design is Framework for the Application of System Thinking (FAST). The result shows that the design of website based is very likely will make the training registration process at Pusdiklatwas BPKP become easier and more efficient, This research is aimed to analysis and design of website based training registration system so the registration process become faster and more efficient.
