Abstrak

[**ABSTRAK**]

Laporan magang ini membahas prosedur audit atas siklus pembelian dan utang yang dilakukan oleh KAP CE atas penugasannya untuk laporan keuangan PT EX periode 1 Januari 2014 sampai dengan 31 Desember 2014. Laporan magang ini membahas prosedur audit yang dilaksanakan KAP CE mulai dari aktivitas perencanaan hingga aktivitas penyelesaian. KAP CE mendeteksi adanya risiko signifikan yang terjadi pada siklus pembelian dan utang. Risiko tersebut yaitu penggunaan basis akrual yang tidak tepat. Terdapat 4 (empat) item lini laporan keuangan (Financial Statements Line Item FSLI) yang harus diuji pada siklus ini. FSLI tersebut yaitu utang usaha; beban dibayar di muka; akrual, provisi & kewajiban lainnya; dan beban operasional. Berdasarkan hasil prosedur audit, dapat disimpulkan bahwa PT EX perlu memperbaiki sistem akuntansi mereka. Di sisi lain, KAP CE telah menggunakan prosedur yang menggunakan ISA sebagai acuannya secara tepat.
