## Abstrak

### [**ABSTRAK**]

Sebagai sebuah institusi regional yang memiliki peranan cukup signifikan dalam menciptakan stabilitas kawasan, ASEAN melakukan upaya pengembangan kerja sama dari waktu ke waktu untuk menjaga relevansinya dalam dinamika politik internasional. Upaya signifikan yang dilakukan oleh ASEAN dalam perkembangannya adalah agenda pembentukan Komunitas ASEAN di mana pada fase ini, perdebatan mengenai pengaturan keamanan di ASEAN dari berbagai perspektif muncul. Perdebatan tersebut pada dasarnya membahas bentuk pengaturan keamanan yang beragam, akan tetapi komunitas keamanan merupakan konsep yang mendominasi sebagai sebuah konsep yang dianggap paling relevan dalam menjelaskan ASEAN pada masa ini. Meskipun begitu, literatur yang ada memperlihatkan bahwa perkembangan konsep pengaturan keamanan yang membahas mengenai komunitas keamanan belum mampu menjelaskan kondisi ASEAN saat ini dan di masa depan karena ASEAN tidak menunjukkan potensi untuk melakukan evolusi sebagai sebuah komunitas keamanan yang mapan menurut konsep yang sudah ada seperti layaknya Uni Eropa. Selain itu, salah satu hal yang menjadi urgensi ASEAN untuk melakukan reformasi institusi sebagai komunitas keamanan yang lebih baik, misalnya dengan reformulasi ASEAN Way.

### **ABSTRACT**

As a regional institution that has significant role in creating regional stability, ASEAN has been developing cooperation from time to time in order to maintain its relevance in international politics. One significant step ASEAN has taken was the agenda of creating ASEAN Community which led to discourses from several perspectives about security arrangement as theoretical framework to understand ASEAN. Those discourses basically discussed different types of security arrangement, with the security community as the most relevant type of security arrangement dominating the study of ASEAN. However, the existing literatures discussing about security community as a security arrangement concept have not been able to fully explain the present and future condition of ASEAN. Since ASEAN has not show any indication yet to evolve into a mature security community as the concept said, just like European Union. Furthermore, there is an urgency for institutional reform within ASEAN to serve the purpose of being a better security community, such as by reformulating the ASEAN Way., As a regional institution that has significant role in creating

regional stability,

ASEAN has been developing cooperation from time to time in order to maintain its relevance in international politics. One significant step ASEAN has taken was the agenda of creating ASEAN Community which led to discourses from several perspectives about security arrangement as theoretical framework to understand ASEAN. Those discourses basically discussed different types of security arrangement, with the security community as the most relevant type of security arrangement dominating the study of ASEAN. However, the existing literatures discussing about security community as a security arrangement concept have not been able to fully explain the present and future condition of ASEAN. Since ASEAN has not show any indication yet to evolve into a mature security community as the concept said, just like European Union. Furthermore, there is an urgency for institutional reform within ASEAN to serve the purpose of being a better security community, such as by reformulating the ASEAN Way.]
