## Abstrak

[**ABSTRAK**]

Peningkatan jumlah lansia di perkotaan setiap tahunnya menimbulkan masalah kesehatan pada lansia, sehingga diperlukannya pelayanan keperawatan masyarakat akan kebutuhan lansia. Masalah yang ditemukan pada lansia yang tinggal di Sasana salah satunya adalah insomnia. Karya ilmiah ini akan membahas terkait Nenek A dengan insomnia. Praktik klinik selama 7 minggu dimana peneliti melakukan terapi non farmakologis dalam mengatasi insomnia di Sasana Tresna Werdha Budi Mulia 1 DKI Jakarta yang bertujuan menganalisis insomnia dengan intervensi back massage dan terapi musik. Pittsburgh Sleep Quality Index bernilai 11 interpretasi kualitas tidur buruk. Intervensi yang diberikan dalam waktu 4 minggu dengan back massage dan musik terapi selama ± 45 menit seminggu 2 kali pertemuan saat memberikan massage dan musik terapi didukung menciptakan suasana yang kondusif dan menjaga privasi, penggunaan baby oil untuk massage, dan teknik massage yang tidak terlalu kuat serta memperhatikan kondisi kulit lansia, serta handscoons sebagai pelindung diri merupakan hal yang mendukung dalam pelaksanaan. Hasil dari intervensi back massage dan musik terapi yang mampu menginisiasi tidur pada klien dan PSQI menurun bernilai 7. Perawat STW diharapkan kedepannya dapat memberikan intervensi pada lansia yang insomnia sehingga dapat meningkatkan kemampuan perawat dalam memberikan terapi secara non farmakologi.
