## Abstrak

### [**ABSTRAK**]

Ansietas merupakan kondisi atau perasaan yang tidak menentu yang dirasakan seseorang yang dapat disebabkan oleh berbagai faktor diantaranya adanya masalah gangguan fisik. Sebagaimana telah dibuktikan bahwa kesehatan umum seseorang mempunyai akibat nyata sebagai predisposisi terhadap ansietas. Ansietas mungkin disertai dengan gangguan fisik dan selanjutnya menurunkan kapasitas seseorang untuk mengatasi stresor. Tujuan karya ilmiah akhir ini untuk memberikan gambaran tentang penerapan terapi penghentian pikiran, relaksasi otot progressif, dan psikoedukasi keluarga dengan pendekatan Model stress adaptasi Stuart dan interpersonal Peplau. Terapi tersebut diberikan kepada klien ansietas sebanyak 16 klien. Hasil penerapan terapi ini menunjukkan dapat menurunkan tanda dan gejala ansietas dan meningkatkan kemampuan klien dalam menggunakan sumber dukungan. Hasil karya ilmiah ini diharapkan Puskesmas dapat melanjutkan terapi penghentian pikiran, relaksasi otot progressif dan psikoedukasi keluarga secara berkesinambungan, meningkatkan dukungan sosial dengan memberdayakan masyarakat.
