

Trombosis vena dalam faktor faktor yang memengaruhi timbulnya sindroma pasca trombosis = Deep vein thrombosis influencing factors of post thrombotic syndrome incidence

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417247&lokasi=lokal>

Abstrak

[ABSTRAK
 Sindrom Pasca Trombosis SPT menyebabkan ketidakconsistenan efektivitas terapi pada pasien Trombosis Vena Dalam TVD karena faktor faktor yang memengaruhi timbulnya SPT belum sepenuhnya dipahami Penelitian ini bertujuan mengetahui faktor faktor yang memengaruhi kejadian SPT pada pasien TVD Penelitian cross sectional ini dilakukan pada 91 sampel Dengan uji chi square didapatkan bahwa faktor faktor yang berhubungan bermakna dengan kejadian SPT adalah jenis kelamin p 0 01 kadar D Dimer p 0 01 riwayat hipertensi pABSTRACT Post Thrombotic Syndrome PTS results in inconsistency of Deep Vein Thrombosis DVT because the factors influencing PTS incidence is not fully understand yet This study aims to understand factors influencing PTS incidence in DVT patients This cross sectional study was being done in 91 samples With chi square test it can be concluded that there is a significant relationship between PTS incidence and gender p 0 01 D Dimer level p 0 01 hypertension p, Post Thrombotic Syndrome PTS results in inconsistency of Deep Vein Thrombosis DVT because the factors influencing PTS incidence is not fully understand yet This study aims to understand factors influencing PTS incidence in DVT patients This cross sectional study was being done in 91 samples With chi square test it can be concluded that there is a significant relationship between PTS incidence and gender p 0 01 D Dimer level p 0 01 hypertension p]
