

Cellular trafficking of cell stress proteins in health and disease

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417310&lokasi=lokal>

Abstrak

This volume brings together experts in the biochemistry, cellular biology, immunology and molecular biology of molecular chaperones and protein-folding catalysts with a focus on the mechanisms of cellular trafficking of these proteins and the role of these variegated trafficking mechanisms in both human and animal health and disease.
