

Farming for food and water security

Eric Lichtfouse, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417345&lokasi=lokal>

Abstrak

This discipline addresses current issues such as climate change, increasing food and fuel prices, starvation, obesity, water pollution, soil erosion, fertility loss, pest control and biodiversity depletion. Novel solutions are proposed based on integrated knowledge from agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy, philosophy and social sciences. As actual society issues are now intertwined, sustainable agriculture will bring solutions to build a safer world.
