

The Classical electromagnetic field

Eyges, Leonard, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417647&lokasi=lokal>

Abstrak

This excellent text covers a year's course in advanced theoretical electromagnetism, first introducing theory, then its application. Topics include vectors D and H inside matter, conservation laws for energy, momentum, invariance, form invariance, covariance in special relativity, and more.
