

The Relevance of the time domain to neural network models

Rao, A. Ravishankar, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417670&lokasi=lokal>

Abstrak

The following broad topics will be covered in the book : synchronization, phase-locking behavior, image processing, image segmentation, temporal pattern analysis, EEG analysis, fMRI analysis, network topology and synchronizability, cortical interactions involving synchronization, and oscillatory neural networks.

This book will benefit readers interested in the topics of computational neuroscience, applying neural network models to understand brain function, extracting temporal information from brain imaging data, and emerging techniques for image segmentation using oscillatory networks
