

Warta Kebun Raya : majalah semi populer

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417800&lokasi=lokal>

Abstrak

Amorphophallus borneensis is endemic species from Kalimantan, belongs to the Araceae family. It is included as one of the giant *Amorphophallus*. This species is indicated by the unique pattern of the petiole and peduncle which resembles the comple patterns of lihen on the stem. The distribution of *A. Borneensis* was only known from soutern of Kalimantan. The new localities have been found during Kebun Raya exploration in Central and East Kalimantan.
