[<b>ABSTRAK</b><br>

Usia prasekolah merupakan masa persiapan anak untuk masuk sekolah. Pada usia ini perkembangan sosial, emosi, dan kognitif anak berkembang dengan cepat. Penelitian ini bertujuan untuk mengetahui faktor-faktor yang mempengaruhi kesiapan anak usia prasekolah untuk mulai bersekolah. Desain penelitian ini menggunakan studi deskriptif. Dengan pengumpulan data kesiapan sekolah menggunakan pemeriksaan Nijmeegse Schoolbekwaanheids Test (NST) pada 206 anak. Hasil penelitian ini menjelaskan sebesar 42,3% anak sudah siap masuk sekolah. Hasil regresi logistik multinomial menunjukkan jenis kelamin anak, pendidikan ibu, pekerjaan ibu, penghasilan keluarga, dan perilaku orang tua merupakan faktor yang mempengaruhi kesiapan masuk sekolah. Penelitian ini merekomendasikan perawat dapat memberikan edukasi tentang pentingnya peran ibu dalam mempersiapkan anak masuk sekolah terutama pada anak usia prasekolah.
