

Microorganisms in environmental management : microbes and environment

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417877&lokasi=lokal>

Abstrak

This survey of recent scientific progress in usefully applying microbes to both environmental management and biotechnology is informed by acknowledgement of the polluting effects on the world around us of soil erosion, the unwanted migration of sediments, chemical fertilizers and pesticides, and the improper treatment of human and animal wastes. These harmful phenomena have resulted in serious environmental and social problems around the world, problems which require us to look for solutions elsewhere than in established physical and chemical technologies.
