Abstrak

The book is a sequel of a similar book, edited by Randolph Menzel and Alison Mercer, "Neurobiology and behavior of honeybees", published in 1987. It is a "Festschrift" for the 70th birthday of Randolph Menzel, who devoted his life to the topic of the book. The book will include an open commentary for each section written by Randolph Menzel, and discussed with the authors. The written contributions take their inspiration from a symposium on the topic, with all the authors, that was held in Berlin in summer 2010.
