

Technological innovations in major world oil crops: volume 2, perspectives

Gupta, S.K., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418078&lokasi=lokal>

Abstrak

The present volume presents essential information on advancements in oilseed production, processing and utilization. Advances in the technology of seed processing to produce oil and oil quality for edible and industrial applications are well presented, followed by hybrid technology, biotechnology, oil technology and meal quality for animal nutrition. The following areas are also covered, the potential for oil in developing biodiesel markets, fatty acid long chains and their derivative, pollination management, and safety of pollinators from harmful effects of pesticides. This volume also includes an economic assessment of oilseed integrated pest management (IPM) programs in different regions of the world.
