

Solar power satellites

Flournoy, Don M., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418248&lokasi=lokal>

Abstrak

Solar power satellites' shows why and how the space satellite industry will soon begin expanding its market from relaying signals to Earth to generating energy in space and delivering it to the ground as electricity. In all industrialized nations, energy demand is growing exponentially. In the developing world, the need for energy is as basic as food and water. The sun's energy is available everywhere, and it is non-polluting. As business plans demonstrate its technical feasibility, commercial potential, and environmental acceptability, every country on Earth will look to space for the power it needs.
