Abstrak

Sobotta - Atlas of Human Anatomy: the exam atlas for understanding, learning, and training anatomy The English-language Sobotta Atlas with English nomenclature is specifically adapted to the needs of preclinical medical students. Right from the start, the book and the Internet content concentrate on exam-relevant knowledge. The new study concept simplifies learning-understanding-training: Descriptive legends help the student identify the most important features in the figures. Clinical examples present anatomical details in a wider context. All illustrations have been optimized, and the lettering reduced to a minimum. Volume 3 "Head, Neck and Neuroanatomy" includes the following topics: HeadEyeEarNeckBrain and Spinal Cord.
