

Lead compounds from medicinal plants for the treatment of neurodegenerative diseases

Wiat, Christophe, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418752&lokasi=lokal>

Abstrak

Wiat presents evidence that natural products are not only able to protect neurons and boost their activities, but also to induce neuritogenesis, raising the possibility that flowering plants helped apes evolve into Homo sapiens during the Tertiary period. In the near future, he says, they may also allow complete victory over neurodegenerative diseases."--ProtoView.com, April 2014
