

Advances in applied analysis

Sergei V. Rogosin, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20418936&lokasi=lokal>

Abstrak

This book contains survey papers based on the lectures presented at the 3rd International Winter School “Modern problems of mathematics and mechanics” held in January 2010 at the Belarusian State University, Minsk. The results discussed are application oriented and present new insight into applied problems of growing importance such as applications to composite materials, anomalous diffusion, and fluid dynamics.
