

Analytic inequalities : recent advances

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419045&lokasi=lokal>

Abstrak

For more than a century, the study of various types of inequalities has been the focus of great attention by many researchers, interested both in the theory and its applications. In particular, there exists a very rich literature related to the well known Chebyshev, Grüss, Trapezoid, Ostrowski, Hadamard and Jensen type inequalities. The present monograph is an attempt to organize recent progress related to the above inequalities, which we hope will widen the scope of their applications.
