Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419499&lokasi=lokal>

Abstrak

This book gives an elementary treatment of the basic material about graph spectra, both for ordinary, and laplace and seidel spectra. The text progresses systematically, by covering standard topics before presenting some new material on trees, strongly regular graphs, two-graphs, association schemes, p-ranks of configurations and similar topics. Exercises at the end of each chapter provide practice and vary from easy yet interesting applications of the treated theory, to little excursions into related topics. Tables, references at the end of the book, an author and subject index enrich the text.
