

Lecture notes on O-minimal structures and real analytic geometry

Miller, Chris, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20419625&lokasi=lokal>

Abstrak

This volume was produced in conjunction with the Thematic Program in o-Minimal Structures and Real Analytic Geometry, held from January to June of 2009 at the Fields Institute. Five of the six contributions consist of notes from graduate courses associated with the program : Felipe Cano on a new proof of resolution of singularities for planar analytic vector fields ; Chris Miller on o-minimality and Hardy fields ; Jean-Philippe Rolin on the construction of o-minimal structures from quasianalytic classes ; Fernando Sanz on non-oscillatory trajectories of vector fields ; and Patrick Speissegger on pfaffian sets. The sixth contribution, by Antongiulio Fornasiero and Tamara Servi, is an adaptation to the nonstandard setting of A.J. Wilkie's construction of o-minimal structures from infinitely differentiable functions.
