

Geodetic and geophysical effects associated with seismic and volcanic hazards

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420072&lokasi=lokal>

Abstrak

Dealing with volcanic and seismic activity, this book comprises eighteen papers, most of which were presented at an international seminar organized and held at the Complutense University of Madrid in October 2001. It addresses geodetic, geophysical and geochemical effects; monitoring; and theoretical modelling of volcanic and seismic processes.
