

Faktor-faktor yang mempengaruhi mortalitas pasien acute respiratory distress syndrome di ICU

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420357&lokasi=lokal>

Abstrak

ARDS is a critical disease that has a mortality rate of 40%-60%. Mortality due to ARDS is influenced by some factors that can be predicted. Those factors should be taken into consideration in patient management so that the mortality rate can be reduced ...
