

Evolution equations of hyperbolic and Schrödinger type : asymptotics, estimates and nonlinearities

Ruzhansky, Michael, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420362&lokasi=lokal>

Abstrak

This volume aims to collect some recent advances in the area in order to allow a quick overview of ongoing research. The contributors are first rate mathematicians. This collection of research papers is centred around parametrix constructions and microlocal analysis, asymptotic constructions of solutions, energy and dispersive estimates, and associated spectral transforms. Applications concerning elasticity and general relativity complement the volume. The book gives an overview of a variety of ongoing current research in the field and, therefore, allows researchers as well as students to grasp new aspects and broaden their understanding of the area. ​
