Abstrak

This is a step-by-step exercise to master excel to solve practical business problems. It is powerful computational ability and graphical functions make learning statistics much easier than in years past. Each chapter explains statistical formulas and directs the reader to use excel commands to solve specific, easy-to-understand business problems. Practice problems are provided at the end of each chapter with their solutions in an appendix. Separately, there is a full practice test (with answers in an appendix) that allows readers to test what they have learned.
