

## Modern optimization modelling techniques / Roberto Cominetti, Francisco Facchinei, Jean B. Lasserre

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420500&lokasi=lokal>

---

### Abstrak

The book contains an expanded version of three series of lectures delivered by the authors at the CRM in July 2009. The first part is a self-contained course on the general moment problem and its relations with semidefinite programming. The second part is dedicated to the problem of determination of Nash equilibria from an algorithmic viewpoint. The last part presents congestion models for traffic networks and develops modern optimization techniques for finding traffic equilibria based on stochastic optimization and game theory.
