

Digital Signal Processing System Design: LabVIEW-Based Hybrid Programming

Kehtarnavaz, Nasser

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420520&lokasi=lokal>

Abstrak

The hybrid programming approach allows the use of previously developed textual programming solutions to be integrated into LabVIEW's highly interactive and visual environment, providing an easier and quicker method for building DSP systems. Digital Signal Processing System-Level Design Using LabVIEW, showed how LabVIEW's graphical programming can be used to build and analyze digital signal processing (DSP) systems in an interactive manner and in relatively shorter times as compared to text-based programming.
