

The Greek language in the digital age

Gavrilidou, Maria, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420642&lokasi=lokal>

Abstrak

This white paper is part of a series that promotes knowledge about language technology and its potential. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020.
