

Autologous resurfacing and fracture dowelling : a manual of transplantation technique

Draenert, Klaus, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420937&lokasi=lokal>

Abstrak

This book describes in detail a unique and very precise operative technique that uses autologous cartilage/bone grafts for the reconstruction of load-bearing joint surfaces and for dowelling of non-unions. The technique, employing diamond instruments and a wet grinding process, has been developed and refined over the past 30 years at the Center for Orthopaedic Sciences (ZOW), first in Bern and later in Munich. A step-by-step description of the method is provided for each indication, with the aid of many high-quality illustrations. Correctly applied, the technique has been very successful in restoring high-level athletes to competition. it can be applied even in ?hopeless cases? and offers excellent late results.
