

Atlas of dermatology in internal medicine

Sanchez, Nestor P., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420994&lokasi=lokal>

Abstrak

Atlas of dermatology in internal medicine is the only concise text-atlas to cover the most common and most important cutaneous manifestations of systemic disease in children and adults. It features more than 150 clinical photographs that are accompanied by format-driven, clinically focused text on the diagnosis and management of cutaneous manifestations of connective tissue, pulmonary, renal, GI, endocrine, malignant, infectious, and HIV disease. There is also a separate chapter on skin diseases commonly seen in the ICU. A special feature is its systematic coverage of clinically relevant dermatopathology.
