Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20421607&lokasi=lokal>

Abstrak

Kecelakaan transportasi dapat terjadi dimana saja. Di Kampus Universitas Indonesia (UI) Depok, tahun 2014 terdapat 82 kecelakaan dan per bulan Agustus 2015 sudah mencapai 96 kasus. Kecelakaan didominasi oleh kendaraan bermotor roda dua. Studi ini bertujuan melihat gambaran dan interaksi faktor yang mempengaruhi keselamatan transportasi kendaraan bermotor roda dua di Kampus UI. Studi bersifat deskriptif analitik dan dilakukan dengan pendekatan kualitatif. Penelitian menghasilkan bahwa kondisi fisik dan sosial di Kampus UI Depok belum cukup adekuat mengakomodasi keselamatan pengendara. Pengendara umumnya memiliki kemampuan dan keterampilan namun cenderung agresif dan tidak taat aturan. Faktor tersebut berinteraksi meningkatkan risiko dari kecelakaan di Kampus UI Depok.
