## Abstrak

### [**ABSTRAK**]

Penelitian ini bertujuan untuk menganalisis faktor faktor yang mempengaruhi pengambilan kebijakan bailout III setelah kegagalan kedua program bailoutdi Yunani Kebijakan bailout III bertentangan dengan opini publik Yunani yang menolak kebijakan bailout diimplementasikan di Yunani Analisis penelitian ini menggunakan teori two level games oleh Robert Putnam dengan metode kualitatif Hasil penelitian ini menunjukkan bahwa pengambilan kebijakan bailout III dipengaruhi oleh tekanan Troika kepada pemerintah Yunani untuk memperpanjang program bailout dan juga tekanan ekonomi domestik yang disuarakan oleh para bankir di Yunani untuk segera mendapatkan bantuan dana sehingga dapat menghindarkan Yunani dari krisis Persetujuan Yunani untuk mengambil kebijakan bailout III mencerminkan lemahnya peran negara dalam menghadapi tekanan internasional maupun tuntutan domestik yang bertentangan satu sama lain

### [**ABSTRACT**]

This research aimed to analyze the factors that influence policy making at the third bailout in Greece after the failure of the first bailout and second bailout Moreover the third bailout policy opposed by Greek public opinion which rejected the bailout The analysis of this research is using two level games theory by Robert Putnam and also using qualitative methods This research shows that the policy making at the third bailout influenced by Troika pressure on Greek government to extend the bailout Furthermore there is economic domestic pressure that voiced by the bankers in Greece to get funding immediately to avoid the Greek sovereign debt crisis Greek agreement to take the third bailout reflects the role of the weak states dealing with international pressure and domestic demands , This research aimed to analyze the factors that influence policy making at the third bailout in Greece after the failure of the first bailout and second bailout Moreover the third bailout policy opposed by Greek public opinion which rejected the bailout The analysis of this research is using two level games theory by Robert Putnam and also using qualitative methods This research shows that the policy making at the third bailout influenced by Troika pressure on Greek government to extend the bailout Furthermore there is economic domestic pressure that voiced by the bankers in Greece to get funding immediately to avoid the Greek sovereign debt crisis Greek agreement to take the third bailout reflects the role of the weak states dealing with international pressure and domestic demands ]
