Abstrak

[<b>ABSTRAK</b><br>

Penelitian ini secara umum membahas mengenai pengaruh tingkat hutang terhadap kinerja perusahaan. Dengan menggunakan data perusahaan periode 2010?2014 pada perusahaan non-keuangan, khususnya perusahaan manufaktur, yang terdaftar di Bursa Efek Indonesia. Data diolah menggunakan analisis regresi OLS dengan metode efek tetap, menggunakan data panel yang merupakan gabungan dari data cross-section dan time-series. Variabel independen pada penelitian ini adalah leverage. Sedangkan variabel dependennya adalah kinerja perusahaan yang diprosikan dengan ROA. Dan variabel kontrolnya adalah umur perusahaan, ukuran perusahaan, dan interest. Hasil penelitian menemukan bahwa tingkat hutang berpengaruh secara signifikan terhadap kinerja perusahaan
