ABSTRACT

This research aims to describe the implementation and benefits of Girl's Talk as a sexual education program in elementary school using qualitative descriptive research method. The results of the research shows that the program's purposes, materials, and methods are in line with the concept of Comprehensive Sexual Education. The implementation of Girl's Talk benefits school and students. However, there are suggestions to broaden the benefits of the program that can be implemented by the school for the program : create a program's guide and curriculum, organize a sexual education training for teachers, and upgrading teachers' creativity on giving the materials.
