Abstrak

[**ABSTRAK**]

Penelitian ini dilatarbelakangi adanya berbagai macam bentuk kampanye yang dilakukan untuk mengumunkan isu atau permasalahan tertentu. Penelitian ini menambahkan kajian teori karena menguji dua faktor sekaligus yaitu hubungan komunikator dan pesan kampanye dengan sikap audiens. Penelitian ini mengambil contoh kampanye pada ASI ekslusif yang dilakukan dengan dua pendekatan, yaitu menggunakan komunikator yang berbeda.

Penelitian ini adalah penelitian eksperimental dengan dua kelompok eksperiment yang diberikan perlakuan berupa bentuk kampanye berbeda. Partisipan berjumlah 40 orang, tiap kelompoknya terdiri dari 20 partisipan. Metode analisis yang diigunakan adalah uji beda rata-rata tiap kelompok eksperiment untuk menunjukan hubungan antara variabel yang diteliti.

Penelitian ini menemukan bahwa komunikator dan pesan kampanye memiliki hubungan dengan sikap seseorang. Penelitian menemukan terdapat perbedaan persepsi dan sikap mengenai komunikator, pesan dan sikap terhadap isu kampanye yang didasarkan oleh perbedaan bentuk kampanye yang diterima. Khalayak menganggap bahwa komunikator dokter dalam konteks kampanye kesehatan dipandang lebih memiliki kredibilitas dibandingkan komunikator kalangan populer
