Abstrak

[**ABSTRAK**]

Tujuan dari penelitian ini adalah menguji efektivitas buku saku dalam meningkatkan pengetahuan ibu terkait mempersiapkan anak pertama menjadi seorang kakak. Penelitian ini menggunakan metode pre-test and post-test design kepada lima orang partisipan yang dipilih melalui purposive sampling. Karakteristik partisipan yaitu ibu yang sedang mengandung anak kedua dan memiliki anak pertama berusia 2-3 tahun. Metode wawancara dipakai sebagai metode pengambilan data. Isi dari buku saku ini terdiri dari lima tips untuk mempersiapkan anak pertama menjadi seorang kakak, yaitu: 1) mengajak anak pertama mengikuti kelas prenatal, 2) diskusi tentang kehamilan dan bayi, 3) mengajak anak pertama ikut serta saat ibu memeriksakan kandungan ke dokter/bidan, 4) membacakan buku cerita tentang kelahiran bayi, dan 5) merasakan gerakan bayi di dalam perut ibu. Hasil analisa statistik wilcoxon signed ranks menunjukkan bahwa buku saku secara efektif dapat meningkatkan pengetahuan ibu terkait mempersiapkan anak pertama menjadi seorang kakak.
