ABSTRAK

Tesis ini membahas mengenai penyusunan clinical pathway dan analisis biaya appendicitis akut RS Bogor Medical Center tahun 2014 berdasarkan clinical pathway. Penelitian kualitatif dan kuantitatif ini dilakukan melalui telaah rekam medik, observasi dan wawancara. Pada akhir penelitian berhasil disusun clinical pathway appendicitis untuk RS BMC dan pada analisis biaya, didapatkan cost recovery rate yang dibayarkan oleh Badan Penyelenggara Jaminan Sosial pada appendicitis akut adalah 67% untuk perawatan kelas I, 58% untuk perawatan kelas II dan 49% untuk perawatan kelas III.

ABSTRACT

This thesis discusses the clinical pathways arrangement and cost analysis of acute appendicitis in BMC hospital based on clinical pathways in the year of 2014. Qualitative and quantitative research was conducted through review of medical records, observation and interviews. At the end of the study an appendicitis clinical pathways for BMC hospital was successfully arranged and from the cost analysis we obtained that cost recovery rate paid by the Social Security Agency (BPJS) in acute appendicitis are 67 % for first-class inpatient room, 58 % for second-class inpatient room and 49 % for third-class inpatient room.
