Abstrak

Despite the advanced technologies at our disposal today, a complete health history and physical examination remain the most crucial diagnostic tools in any healthcare practitioner's arsenal. And no one teaches these all-important skills better than Mark H. Swartz, MD, FACP. For nearly two decades, Dr. Swartz's textbook has shown readers how to derive the maximum diagnostic information from interviewing and examining patients. Using a compassionate, humanistic approach, Dr. Swartz explores how cultural differences can influence communication, diet, family relationships, and health practices and beliefs, and demonstrates that your interpersonal awareness is just as essential in physical diagnosis as your level of technical skill.
