

Memahami HAM dari Perspektif Teori Nilai-Nilai

Ceufin, Fransiskus

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20424776&lokasi=lokal>

Abstrak

To understand human rights from the perspective of the value theories, the article applies axiological approach. It places man as a valuing animal, who acts consciously drawn by certain values. They are to help man to give meaning to his life. The legal form of the human rights was established in 1215, known as the Magna Charta Libertatum, which later permeated the Universal Declaration of Human Rights (1948). It reflects man's ethical and political awareness of his natural rights, which in essence, has no tie with values, dignity, and sovereignty.
