

Leksikal Penanda Ukuran Waktu Bahasa Jawa pada Masyarakat Desa Klooduwur, Kecamatan BanjarRejo, Kabupaten Blora, Jawa Tengah

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425367&lokasi=lokal>

Abstrak

This study is aimed at describing the lexical of time, during day and night, in Klopoduwur village community. The data are collected through interview technique and then analyzed by using intralingual identity method. The result of analysis shows that javanese has rich number of lexical markers of time which are not found in other languages. The word 'wayah' is only equaled to the words which mean 'circular or repetitive'. Alignment of words either in the form of free morpheme or polimorfemis on the formation of lexical marker of time measurement has a grammatical 'time' and metaphorical meanings
