

Metro revealed : building Windows 8 apps with HTML5 and JavaScript

Freeman, Adam, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425423&lokasi=lokal>

Abstrak

Windows 8 introduces WinRT, the API for accessing the operating system and the underlying hardware where Metro applications run. WinRT can be accessed through multiple development languages, including C++, .NET languages and JavaScript. Developers from all backgrounds can use their skills to build beautiful and fast Windows 8 applications. Author Michael Mayberry takes you through a quick overview of this new addition in WinRT Revealed and will get you started quickly in developing Windows 8 applications in this new environment.
