

Data mining : foundations and intelligent paradigms. Volume 3 : medical, health, social, biological and other applications

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425701&lokasi=lokal>

Abstrak

Data mining is one of the most rapidly growing research areas in computer science and statistics. Areas of application covered are diverse and include healthcare and finance. We wish to introduce some of the latest developments to a broad audience of both specialists and non-specialists in this field.
